

CCA's expertise engages the Arrow Energy project leadership, business stakeholders and users to define and integrate operations, technologies, ergonomics, visual ergonomics, human factors and the built environment, to realise their own design of the Operations Centre.

Engagement with the Arrow team was paramount to understanding and applying ergonomics to define and design their safe, efficient, effective and comfortable built environment.

The ergonomic design of the Arrow Energy operations centre...

“CCA’s design process following the ISO 11064 standard, combined with their strategic partnerships with key specialists and their experience in developing many control centres has delivered Arrow an excellent operations centre which exceeds our expectations. Russell and his team are great to work with.

They have always delivered a quality result.”

Chris Fletcher, Operations Systems Technical Lead, Arrow Energy Pty Ltd
