

Origin engaged CCA to facilitate user engagement and participatory ergonomic design for the Australia Pacific LNG Integrated Operations Centre in Brisbane.

A key outcome was balancing open planning for operations integration and mentoring and training with periods of individual focus at the control console. The result was the bespoke, three-part, articulated desktop consoles which could alternate between broad "open" and narrow "cockpit" configurations.

The ergonomic design of the APLNG BIOG

"Russell's hands-on style and thorough engagement with stakeholders resulted in cost saving solutions, esthetically pleasing details and functional features in the design."

I can't say enough about Russell's engagement."

Mike Timmke, Integrated Operations Group Manager, ConocoPhillips

"I was very fortunate to work with Russell Ockendon and his extended ergonomics and human factors team to help design and implement Origin's Brisbane IOC..."

A job well executed."

Andrew Taylor, MD, Expert Project Management Pty Ltd (Origin PM)
